Safety From All Sides

Industrial Safety Helmets are moulded in HDPE plastic material. Fully adjustable
It is very comfortable and useful
Available in different colors.

Plastic Chain Available in Different Type

Metal Crash Barrier

Metal Crash barriers are basically Road safety system which prevents vehicles from colliding with obstacles such as boulders, walls, buildings and also prevents vehicles entering into large storm drains, steep slopes or deep water.

Wire Rope Barrier

Wire Rope Safety Barrier has gained popularity as a median barrier for the prevention of cross-median accidents. Cross-median accidents are typically violent collisions with a high probability of multiple serious injuries and death.

CCTV Camera

Traffic cameras are an innovative and extremely functional use of video surveillance technology. You've seen their footage during traffic reports on the TV news. They're atop traffic signals and placed along busy roads, and at busy intersections of the highway. Whether they're recording traffic patterns for future study and observation or monitoring traffic and issuing tickets for moving violations, traffic cameras are an explosively popular form of video surveillance.

SAFETY BOLLARD

ABS round body fitted with 9 nos. of 100 mm Dia highly reflective reflector made of PMMA material mounted on powder coated rectangular steel pipe. Available colour are Red, white and Yellow.

Safety Light

The Safety Light is an essential piece of equipment for police, firefighters and rescue teams. This compact light emits 360 degrees of ultra bright light from an array of 165 LEDs, visible from miles away. It is also waterproof & shockproof.

The safety light has 10 flash patterns and it runs up to 100 hours on the replaceable batteries.

RFI - SL001

Specifications

Size : 12 cm x 3.5 cm
Weight 180 g with battery
Battery : Lithium battery
Shelf life 10 years

SOLAR DELINEATOR

A superior quality solar delineators, which can be mounted on a pole, cone etc to warn motorists from a distance of an approaching crossovers, flyovers etc.

The delineator provides clear visible guidance in all weather conditions and help to ensure driver safety.

Long lasting, easy to mount makes it user friendly and economical.

RFI - SD001

Specifications

Four ultra bright flashing LEDs.
Available in red or yellow colors.
Special base for mounting on cone, pole etc.
High quality reflective solar panel to maximize sun absorption.
Operating time 3-4 consecutive days (with full charge).

REFLECTORS

Reflectors are skillfully designed to give the maximum reflection and enhance visibility of vehicles during night or bad light conditions.

The high reflection gives the drivers early warning.

The reflectors are fixed to the base plate using ultrasonic welding method which protects the inner reflecting surface from dust, water and humidity giving them Sustained Life.

They never get discoloured because of the UV stabilizer used in their making.

Available in various sizes, these reflectors can be used on either side of all types of vehicles,
